

Wiki Workshop Discovery Learning

BE SURE TO SAVE OFTEN. (Click **Edit** again to resume working).

Basic Tasks

1. Create a **New Page**. (Do all your work on that page).
2. Add some text and make it *italicized*.
3. Create a bulleted or numbered list.
4. Change the text style: **color, font and size**. (HINT: Highlight text first).
5. Add **Heading text** at the top of your page. Add a section heading (Heading 2 or 3) as well.
6. Add a copy/paste hyperlink to an **external website** (e.g. <http://creativecommons.org/>) (HINT: paste and save)

Medium Tasks

1. Create a **contextual hyperlink** (like the example at left) to an **external website** (not a wiki link) that opens in a **new window**. (HINT: Start by **highlighting the text** you want to link to).
2. Create a contextual **wiki link** to the **homepage** of this wiki.
3. Upload and insert a picture from your computer. Resize if necessary after inserting. (HINT: File button)
4. Attach a PDF file or Word document to your page.
5. Insert a **3 x 3 table**. Add text to each cell. (Names of superheroes, favorite books, random numbers, your name nine times -- whatever you want).
6. Leave a discussion comment on the **home** page.
7. Write some random (unwanted) text at the top of your page and save it. Then check the **history** of your page. Compare versions and **revert to a previously saved version** of the page. Be sure to add a comment about why you are reverting.
8. Under **Manage Wiki**, be able to show/tell me steps to:
 - o Change the design and color scheme of the wiki.
 - o Change the privacy settings for the wiki.
 - o Invite or remove members.
 - o See a list of all the pages on the site.
 - o Manage all of the uploaded files.

Stretch Tasks

1. Add a **table of contents** to your page. (HINT: Widget > Wikispaces)
2. Embed a **YouTube** video.
3. Insert a **linked picture from an external website**. Use the **Wikimedia Commons** to find your image. (HINT: Be sure you are looking at the full sized picture. Right-click the image to copy the link address).
4. Embed any of the following: **Slideshare**, **Voicethread**, **Glogster**, **Wallwisher** (HINT: Widget > Other)
5. Embed an RSS feed for **a blog** (any blog you want). (HINT: Right click the blog/site RSS icon to copy the link address for the feed).

If you finish early....
